DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-31 rejected under 35 U.S.C. 103(a) as being unpatentable over Leedom.

Leedom discloses in figures 1-11 a dose protector for use in an inhaler, substantially as claimed. However, Leedom doesn't disclose the cover means 12 being moved by air only or the sealing flap being made of thermoset rubber. Leedom on the other hand discloses a more advance way of moving the cover by electric current, mechanical or magnetic sources.

The main issue here is whether Leedom is capable of being open by air. Applicant hasn't claimed an air activated cover, but a cover that can be open by air. Applicant has disclosed that the cover is made of a shape memory material. Leedom discloses that the cover 12 is also made of a shape memory material. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the cover as disclosed by Leedom could be open by air, electrical current, mechanical or any other source. Since Leedom disclosed the cover can be made of shape memory material one would understand that thermoset rubber could be used

because it is a shape memory material. As for claim 31, Leedom discloses a dose protector a dose of medicament 10 a pocket 13 and a cover that is a sealing flap 13.

The examiner is requesting a telephonic interview to try and resolve the issues and amend the claims to get this case in condition for allowance.
